Focus on closing – successful change in ownership expected in Q3/4 2018

Privatisation

Initial closing conditions met:
- Approval of Federal Cartel Office and Austrian anti-trust authorities granted in April 2018 (merger control)
- Approval of state parliament in Schleswig-Holstein granted in April 2018
- Approval of Hamburg City Parliament granted in June 2018

Further milestones:
- Guarantee – confirmation of final settlement of the second loss guarantee by HSH Finanzfonds AöR
- SFG – DSGV guarantee scheme
- Ownership control procedure - ECB
- Viability review – European Commission

Transformation intensively pressed ahead:
- Profitable and risk-oriented growth strategies developed
- Reduction in complexity with significant cost reduction potential

Fulfilment of the other closing conditions depends, among other things, on transition from the public-sector to the private law guarantee schemes.
Transformation of the business model for a sustainably profitable bank with a healthy balance sheet structure

Privatisation

- **Further relief from almost all legacy burdens** thanks to portfolio transaction - transfer of NPE upon closing
- **Reduced complexity within the organisation** - including dissolution of the Non-Core Bank and termination of the guarantee
- **Increased efficiency** – among other things, further measures to reduce complexity
- **Optimised liabilities side** - among other things by attracting other retail deposits
- **Liquidity built up** to be reduced in a targeted manner
- **Trend towards higher net margins** due to decreasing liquidity costs and rising interest rate environment
- **Rising commission income** – initiatives launched by market and product units
- **Normalisation of loan loss provisions**
- **RWA-friendly business approaches** by expanding syndication activities (for example, SLS² and debt fund)

Management system and defined management indicators of the IFRS Group

The Bank’s integrated management system is aimed at the targeted management of key value drivers – income, efficiency/costs and profitability, risk, capital and liquidity. The Bank uses a risk-adjusted key indicator and ratio system for this purpose that ensures that the Overall Bank, Core Bank and Non-Core Bank are managed in a uniform and effective manner. The HSH Nordbank Group is managed mainly on the basis of figures for the Group prepared in accordance with the International Financial Reporting Standards (IFRS) and the relevant prudential rules, respectively.

Within the framework of management reporting, the Bank focuses on the most important management indicators for the individual value drivers of the IFRS Group. On the one hand, the focus is placed on the change in these key indicators compared to the same period of the previous year and, on the other, on their expected change over the remainder of 2018.

Further information on the management system and defined management indicators of the HSH Nordbank Group is set out in HSH Nordbank Group Management Report for the 2017 financial year in the “Management System” subsection in the “Basis of the Group” section, and in the “Forecast, opportunities and risks report” section.
